

Two dimmer models, a slave version, and a programmable master, combined with different power and amperage. CBM (DTD-1) and CBM (DTD-2) the only devices specially designed for dimming CBM 120, 230V LED lamps from 0.2% to 100% without flashing / flickering.

	DTD-1-PRO/SLAVE	DTD-2-PRO/SLAVE
1	LED touch screen with push button	
2	1 zone dimmer - 10amp (1200W/120V)	2 zones dimmer - 20amp (2400W/120V)
3	Module with 8 climbs and 8 descents per day	
4	Dimmable by transistor mode	
5	1,200 Vac protection against peak voltage	
6	Dimmable from 0.2% to 100% without flashing with (CBM luminaire)	
7	2 years warranty (against any manufacturing defect)	
8	Potentiometer: low level adjustment screw	
9	Selectable operation at the beginning or end of the phase
