

Designed to automate and optimize livestock lighting, the Solo lighting controller provides precise control of lighting duration and intensity throughout the production lifecycle. Equipped with an intelligent processor, users can program up to 20 lighting periods with up to 3 cycles per period and simulate natural sunrises and sunsets with smooth transitions.

Available in 120V version, this Triac based dimming control operates in Master or Slave modes and offers 2 independent zones with electronic bypass switches for manual/automatic mode selection.

	DTI-2-PRO-120V
Line voltage and Frequency	120 Volts - 60 Hz
Main Fuse	8.33 amps
Dimming inputs	1 input 0-10V source
Dimming outputs	None
Dimming technology	Triac
Power output	2 zones of 8.33 amps
Screen	LCD with pushbuttons
Bypass switches	Switch and potentiometer
Operation mode	Programmable or Slave
Programing	20 periods of 12 steps
Minimum level setting method	Program setting
Dimensions	260mm x 150mm x 220mm
Warranty	2 years warranty on any manufacturing defect
Origin	Made in Canada
